## BROOKS FOUNDRY

### CERCLA Classification

Brooks Foundry was a generator and transporter of materials to the Albion-Sheridan Township Landfill. A former employee of the Albion-Sheridan Township Landfill stated that the foundry transported and deposited dust, sand, and other solid material or debris into the landfill (PC 26-1). Although the former landfill employee could not provide a more detailed description of the waste, the material appears to be typical of foundry wastes.

This investigation did not determine if the materials disposed of by Brooks Foundry at the Albion-Sheridan Township Landfill were hazardous. Brooks Foundry is not registered with the State of Michigan as a hazardous materials generator.
